PROJECTS

Android Voting System Using Face Recognition

- The android voting system using facial recognition is developed using Android Studio with Python as a programming language.
- Store data using email and password for user signup/login functionality.
- The application has two modules, Admin Modules and User Modules.
- This study was designed to tackle the illegalities in the electoral process in the country or organization.

Pizza Delivery App | [JavaScript](#), [ReactJs](#)

- User login and Admin login with complete registration, email verification and forget password system.
- All orders made by user displayed in "My orders".
- Admin can see present users list, pizzas list, orders list, bases list and topping list.
- Store data using email and password for user signup/login functionality.

Ecommerce Website | [ReactJs](#), [Javascript](#), [TailwindCSS](#)

- ECommerce Online Shop Design made in HTML5 & CSS with JavaScript.
- The website seamlessly adapts to different screen sizes, providing an optimal user experience.
- This project allowed me to showcase my skills in front-end web development and create a visually appealing and user-friendly online shopping platform.
- The website features a responsive design, intuitive navigation, and a seamless shopping experience, all achieved using only HTML and CSS.

TECHNICAL SKILLS AND INTERESTS

Areas Of Interest: Web Development, UI/UX Designer

Languages: C/C++, JavaScript, Python, Figma, Canva, Photoshop

Web Development: HTML, CSS, Reactjs

Databases Used: MongoDB, MySQL

API and Tools: Git, Github, REST API

Core Fundamentals: Operating System, Database Management, Computer Networking

CODING PROFILES

- Solved 170+ DSA problems on [Leetcode](#).

CERTIFICATIONS

- Web Development Intern at Hunar Intern.
- Complete Frontend Development (Great Learning).
- Web Development and Designing Intern (Oasis Infobyte).
